

IMPACT+ OCR

IMPACT+ OCR is the new Datalogic innovative solution for robust and effective Optical Character Recognition (e.g. expiration date, lot number) for the Food & Beverage industry.

The new Datalogic P19 Smart Camera is powered by IMPACT+ OCR, providing a dedicated User Operator Interface which easily performs multiple OCR inspections.

The P19 Smart Camera is an embedded stand-alone device that features a high resolution CMOS sensor with 1280x1024 pixels at up to 60fps.

Lenses and illuminators are fully interchangeable and can be mounted and replaced by the user. Five focal lengths and nine lighting options result in 45 different combinations delivering outstanding installation flexibility while offering superior image acquisition capabilities.

With compact dimensions and rotating connectors, the P19 can be installed even in extremely narrow spaces. The IP67 rated metal housing guarantees maximum protection in the most harsh factory environments containing dust, water and oil.

USER AND OPERATOR INTERFACES

P19 features the intuitive and easy-to-use **IMPACT+ OCR** User Interface for creating multiple inspection recipes for OCR and code reading applications. **IMPACT+ OCR** includes the following panels:

Image Setup

A quick way of choosing the best image acquisition settings (from 4 to 16 different self-regulating combinations of shutter time and gain).

Reading tools

A combination of OCR and code reader tools for simultaneous multiple readings.

Anchor Point

An easy way to set a reference point for OCR reading (edge, shape or code location).

Input/Output

A verify string or a digital signal can be used to input the reference string. Messages and digital outputs can be sent quickly to other devices.

Monitor

IMPACT+ OCR includes a straightforward Operator Interface which shows current readings (code and OCR) and easily allows operators to load any configured inspection recipe.
